

7. Warranty Terms by Category

Warranty coverage is separate from the ordinary change-of-mind return window. A product can be outside its return window and still be eligible for warranty service if the defect falls within the applicable warranty term.

7.1 Warranty Table

Category	Nimbus standard warranty	Typical coverage
Smartphones	12 months	Manufacturing defects
Laptops	24 months	Hardware defects
Tablets	12 months	Manufacturing defects
TVs	24 months	Hardware/manufacturing defects
Small appliances	12 months	Manufacturing defects
Large appliances	24 months	Manufacturing defects
Furniture	12 months	Structural/manufacturing defects
Footwear	6 months	Manufacturing defects
Clothing	6 months	Manufacturing defects
Bags	12 months	Manufacturing defects
Sports equipment	12 months	Manufacturing defects
Accessories	6 months	Manufacturing defects

Manufacturer-specific warranty terms may be longer or shorter and take precedence when the product page explicitly identifies them.

7.2 Warranty Exclusions

Warranty coverage normally excludes: - accidental damage, - liquid damage unless explicitly covered, - cosmetic wear, - normal wear and tear, - misuse, - unauthorized modification, - incorrect installation, - damage caused by unsuitable accessories, - consumable depletion, - damage resulting from external events.

7.3 Warranty Process

The customer provides the order number, product serial number where applicable, description of the defect, and requested evidence. Support may provide troubleshooting instructions before approving a replacement or repair.

If remote troubleshooting cannot resolve the issue, the case may be routed to the warranty team or manufacturer service center.
