

8. Order-Cancellation Policy

Customers can request cancellation before an order reaches a non-cancellable fulfillment stage.

8.1 Cancellation by Status

Order status	Cancellation
Payment pending	Normally allowed
Confirmed	Usually allowed if fulfillment has not started
Processing	Case-dependent
Packed	Usually not cancellable
Shipped	Not cancellable; customer may use return process
Out for delivery	Not cancellable
Delivered	Return process applies

Cancellation is a request, not a guarantee. If the warehouse has already packed or transferred the parcel to a carrier, cancellation may no longer be operationally possible.

8.2 Cancellation Refund

If cancellation is approved before shipment, Nimbus Commerce initiates the refund according to the payment method. Online payment refunds generally follow the payment provider's processing time.

COD orders that are cancelled before dispatch do not require a COD refund because no cash payment was collected.

8.3 Customer Refuses Delivery

Refusing delivery is not the preferred cancellation method. The customer should request cancellation before shipment where possible. A refused parcel may incur operational handling costs and can delay the refund.
