

9. Loyalty-Points Redemption Policy

Nimbus Rewards points can be earned on qualifying purchases and redeemed for eligible discounts or benefits.

9.1 Redemption Rules

- Minimum redemption: 500 points.
- Standard conversion: 100 points = €1 discount.
- Maximum points redemption: 30% of eligible merchandise subtotal.
- Points cannot normally be exchanged for cash.
- Points cannot be transferred between customer accounts.
- Points cannot be used to pay taxes or certain regulated fees.
- Some promotional items may be excluded.

The redemption interface displays the maximum number of points that can be applied to a particular order.

9.2 Points Expiration

Unless a campaign states otherwise, reward points expire **12 months after the month in which they were earned**. A customer may see pending points before they become redeemable.

Cancelled or returned purchases may reverse points that were originally awarded for those purchases.

9.3 Refunds and Loyalty Points

When an order paid partly with points is refunded, the cash portion is refunded according to the original payment method and eligible points are normally returned to the customer's rewards balance.

If points were earned from the purchase being returned, those earned points may be removed.

9.4 Promotional Multipliers

During a 2x or 3x points campaign, the campaign-specific terms determine which products qualify. Promotional points may have a separate expiration date if explicitly stated.
