

18. Address Change Policy

Customers may request an address change while an order remains in an editable fulfillment stage.

Once an order is packed or handed to the carrier, the address generally cannot be changed directly. The customer may be offered carrier redirection if available, or the order may proceed to delivery and then use the applicable return process.

Address changes cannot be used to redirect controlled or restricted products to an unsupported destination.

If a customer enters an incorrect address and the parcel is returned to Nimbus Commerce, support should determine whether a reshipment is possible and whether additional shipping charges apply.
