

19. Promotional Discount and Coupon Policy

Promotional codes are subject to their individual campaign terms.

Common restrictions include: - minimum basket value, - eligible product categories, - one code per order, - customer-account restrictions, - campaign expiration, - geographic restrictions, - seller restrictions, - exclusion of already discounted items.

A coupon cannot normally be converted to cash.

19.1 Failed Coupon Application

If a coupon fails at checkout, the customer should first verify the campaign requirements. Support may manually investigate only when the customer provides enough information to reproduce the issue.

19.2 Returns After Promotion

When a customer returns one product from a discounted multi-item order, the refund engine recalculates the applicable discount. A customer should not automatically expect the full undiscounted price of the returned product.

19.3 Price Adjustments

Nimbus Commerce may provide a price adjustment within 7 days when a qualifying price difference is caused by a Nimbus Commerce price change. Promotional coupon differences are excluded unless the promotion terms state otherwise.
