

23. Marketplace and Seller-Fulfilled Orders

Nimbus Commerce hosts products sold directly by Nimbus Commerce and by approved marketplace sellers.

Seller-fulfilled orders may have different: - return addresses, - processing times, - warranty providers, - return windows, - shipping methods, - escalation paths.

The order system must be checked before giving a seller-specific policy answer.

If the seller is responsible for fulfillment, Nimbus Commerce support remains the customer's initial support channel unless the order explicitly instructs the customer to contact the seller.

Seller disputes that remain unresolved may be escalated to Marketplace Operations.
