

28. Operational Definitions

Business day: A day on which Nimbus Commerce's relevant operational and banking partners normally process transactions, excluding configured weekends and holidays.

Calendar day: Every day, including weekends and holidays.

Delivery date: The date recorded by the carrier or fulfillment system as successful delivery.

Return request: A customer's submitted request to return a product. It is not the same as an approved return.

Return authorization: Approval to send an item back under a specific return case.

Inspection: Physical or technical assessment of a returned product.

Refund initiated: Nimbus Commerce has sent the refund instruction to the payment/refund system.

Refund completed: The relevant payment system confirms completion.

COD: Cash on Delivery.

SLA: Service Level Agreement or operational delivery target.

Reverse pickup: Collection of a return parcel from the customer's address.

Final sale: Product status indicating that ordinary change-of-mind returns are unavailable, subject to defect and fulfillment protections.

Escalation: Transfer of a case to a specialized team because frontline support cannot complete the required action.
